

Tooele County Sheriff's Office
Job Title: System Technology Analyst II-III
Salary Range: \$24.18-\$26.66 DOQ
Status: Full-time w/benefits
Closing Date: Open until filled

The Opportunity

This position will support other EMS, fire and law enforcement agencies County-wide using Motorola software as they intertwine with Tooele County Sheriff's Office (TCSO), the Tooele County Information Technology (IT) department, and Tooele County Geographic Information System (GIS) department.

This opportunity includes a great comprehensive benefit package:

- 401k match, health, dental, life and vision benefits
- Participating Utah Retirement Services (URS) member
- PTO and 11 paid holidays

Example of Duties:

- Performs general hardware and software system administration.
- Serves as the main point of communications between Motorola Solutions and Tooele County Sheriff's Office.
- Knowledgeable of the Motorola Geobase database, Mobile AVL and Mapping systems.
- Coordinates and/or performs recurring training for end-user agencies.
- Sets up Motorola tables as well as user groups, user privileges, various database parameters.
- Creates and maintains Crystal Reports for Tooele County Sheriff's Office.
- Other duties as assigned (see job description)

Minimum Qualifications

- A. Bachelor's Degree in Information Technology, Computer Science, Software Engineering, or a closely related field.
- B. Five (5) years of network infrastructure or other closely related experience. Preference given for experience in Motorola software and experience working in a law enforcement environment. Education and experience may be substituted, one for the other, on a year for year basis.

AND

- C. Must pass a background investigation; must be able to maintain BCI access within three (3) months of hire required to be on-call or available after hours for troubleshooting or system failures.

Knowledge, Skills & Abilities

Analog and digital communications systems including voice, data and video; Windows server and Linux OS configuration and management; installation and support of native and third-party server-based software. Ability to analyze and solve complex problems; exercise sound independent judgement. See full job description.
